CHRISTCHURCH**

Dear Greg,

USE OF SCREW PILES TO ANCHOR LIFTED BUILDINGS

We are writing this letter to formalise the relationship between your company and our Association in relation to a restraint system we have been developing to anchor buildings that have been lifted for foundation replacement.

The Association represents the interests of 35 house moving member companies who undertake the lifting and relocation of buildings throughout New Zealand.

The Association views your company as the preferred supplier of screw piles for use in the restraint system that has been developed.

Yours sincerely

**Jonathan Thomson
Chief Executive**
